## **An Important Message from The Cape Royale Utility District**

March 16, 2020 – The Cape Royale Utility District continues to monitor Coronavirus / COVID-19 guidance from federal and state government agencies. The emergence of COVID-19 has caused understandable questions about public health and local water supplies.

Federally, the U.S. Centers for Disease Control (CDC) and the U.S. Environmental Protection Agency (EPA) provide helpful resources about COVID-19 and the safety of drinking water.

According to the CDC: “The COVID-19 virus has not been detected in drinking water. Conventional water treatment methods that use filtration and disinfection, such as those in most municipal drinking water systems, should remove or inactivate the virus that causes COVID-19.”

More CDC information is available at:

<https://www.cdc.gov/coronavirus/2019-ncov/php/water.html>

According to the EPA: “The COVID-19 virus has not been detected in drinking-water supplies. Based on current evidence, the risk to water supplies is low. Americans can continue to use and drink water from their tap as usual. EPA has established regulations with treatment requirements for public water systems that prevent waterborne pathogens such as viruses from contaminating drinking water and wastewater. COVID-19 is a type of virus that is particularly susceptible to disinfection and standard treatment and disinfectant processes are expected to be effective.”

More EPA information is available at:

Locally, the safety and health of our community is our top priority. The water professionals on our staff have always worked diligently year-round to maintain our quality of service to the community, and we will continue to do so through this COVID-19 event. Our water and wastewater treatment systems remain safe. We have already made plans in the event that there are any impacts to our supply chain, such as chemical and material suppliers. We continue to plan for successfully meeting the current challenges.”

Please continue to heed the public health guidance of federal and state officials, stay safe, and take care of your family and friends. Thank you.
